VIGI’s industry-leading ColorPro Night Vision technology enables its cameras to pierce the night and see everything in fine detail. By adopting this best-in-class technology, VIGI C540S can provide 4MP high resolution and capture more vivid full-color images in extreme low-light conditions.

Better than the Naked Eye

Featuring high low-light sensitivity, VIGI’s ColorPro Night Vision produces unparalleled colors along with amazingly crisp images in ultra-low light conditions, which can’t be achieved with natural eyesight.**

Beyond IR, Beyond Full-Color

Images captured by IR cameras or traditional full-color cameras will suffer from digital noise and the loss of detail. VIGI’s ColorPro Night Vision cameras reveal excellent image details even in extreme darkness.**

Less Light Pollution

Bright illumination is required by conventional full-color cameras to capture images at pitch-dark hours. But VIGI's ColorPro Night Vision cameras delivers true color and bright imaging even in extremely low light with no spotlights needed, greatly reducing environmental light pollution.

Core Technology

Powerful Pan Tilt

Cover every corner flexibly with VIGI’s Pan Tilt camera. Customized patrol routes provide more intelligent and quick options to monitor key areas (up to 8 points for each route), reducing manual costs for adjusting pan & tilt angles repeatedly.

Human & Vehicle Classification

Integrated AI chips support advanced algorithms to distinguish humans and vehicles from other objects. You can flexibly customize alarm rules to match your monitoring needs and receive more accurate event notifications.

Automatic Tracking

Automatically tracks persons or vehicles of interest and provides seamless and longer video. This way, you will better understand what's happening and take action without wasting time on irrelevant footage.

Comprehensive AI Detection with Pre-Set Rules Supported

By setting the detection rules in advance, VIGI AI-powered cameras can accurately capture various abnormal events. This will greatly reduce false alarms and cover your specified monitoring needs in different scenarios.

Set customized activity zones around key areas for more focused monitoring.

Face Recognition

VIGI’s advanced built-in face recognition algorithm enables cameras to intelligently capture faces, extract facial features, and form unique facial data. By comparing the facial data with a face library, quickly match a human face, efficiently reducing the risk of unauthorized access.*

People & Vehicle Analytics

Quickly find people and vehicles of interest using a series of attributes.

People Analytics

Filter people of interest by various attributes, such as hair length, and clothing, allowing you to improve search efficiency.*

Vehicle Analytics

Identify and search for vehicles of interest based on vehicle color and type for targeting meaningful events in a short time.*

Active Defense

Warn potential intruders off instantly with sound and light to pro-actively protect your property, even while away from the scene.

Two-Way Audio

With voice intercom support, carry two-way conversations while watching your feed from anywhere.

Smart Video Coding by H.265+

Without using any extra bandwidth, your cameras transmit compressed crystal-clear video to save disk space, ease network loads, and reduce monitoring costs without sacrificing image quality.

PoE Connection, IP66 Weatherproof

PoE technology makes your wiring remarkably easy. Reliable IP66 enables stable outdoor performance.

Flexible Storage

Local storage is available for each method, as well as onboard storage with an SD card slot (up to 256 GB).

Remote Management

Take full control over your security anytime and anywhere on the VIGI app or client.

Live Views and Real-Time Alerts

Easily check your business security via 24/7 live views. Get notifications as soon as the cameras detect something abnormal.

Easy & Smart Playback

Quickly review and locate certain video clips by event, vehicle, person, time, and more. This will greatly improve event backtracking efficiency and reduce labor costs.

Customized Monitoring Patterns

Based on your monitoring needs, you can freely preset motion zones, adjust the rotation angle, set zoom in & out, customize patrol routes, control patrol routes, and more.

Four-Way Management

Flexibly manage your cameras via the web UI, NVR UI, VIGI app, and VIGI Security Manger for ease and convenience.

One system. Full security.

Run your business with peace of mind.

The VIGI professional surveillance system by TP-Link is dedicated to protecting the business you've worked hard to build — whenever, wherever. Our outstanding functions, reliable quality guarantees, and simplified installation work together to ensure your business stays safe and sound.
