

TP-Link AC1200 Mesh Wi-Fi Extender

Model: RE330

Manufacturer: TP-LINK

EAN: 4897098683033

Product Code: 1730353

R1,196

Boost WiFi Signal Wherever You Need it

A single router has limited WiFi coverage and always causes WiFi dead zones. RE330 wirelessly connects to your existing router and expands its WiFi signal into areas it can’t reach on its own. Enjoy stable and high-speed AC1200 network experience wherever you’re at your home.

Faster Dual Band WiFi Up to 1200 Mbps

The RE330 delivers dual band (2.4GHz and 5GHz) to transmit WiFi signal, doubling the performance of single band. It enables you to keep more devices connected at the same time with its 2.4GHz 300 Mbps and 5GHz 867 Mbps dual bands. Use the 2.4GHz band to send email and browse the web, and the 5GHz band for gaming and HD streaming.

TP-Link OneMesh™

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

OneMesh™ is a simple way to form a Mesh network with a single Wi-Fi name for seamless whole-home coverage. Just connect a OneMesh™ range extender to a OneMesh™ router. No more searching around for a stable connection.

Enjoy a Mesh Network with Your Existing Router

Want a Mesh network? Hesitate on whether to replace your existing router and buy a Mesh set? TP-Link OneMesh™ resolves your dilemma.

Adaptive Path Selection: Keeps itself work at top-speed

Adaptive Path Selection keeps your network running at top-speed by automatically choosing the fastest connection path to the router. Always get your devices at fast and stable, especially ideal for network environment crowded with many devices and applications.

High Speed Mode: Maximized Speed with Dedicated Backhaul

Uses one dedicated WiFi band as backhaul and another dedicated WiFi band as an access point to maximize the bandwidth on the extended WiFi.

Built-in Access Point Mode

RE330 is more than a wireless range extender. Simply plug an Ethernet cable into its Ethernet port, and easily turn your wired internet connection into a 2×2 MIMO dual band wireless access point.

Control at Your Fingertips

Set up and manage your Wi-Fi through the TP-Link Tether app from your smartphone (Android, iOS), including TP-Link routers and range extenders.
