Turn a USB Type-C port on your laptop into three USB Type-A ports (5Gbps) and one USB Type-C port

This TAA compliant 4-port USB 3.2 Gen 1 hub lets you connect a wider range of peripherals to your MacBook Pro, MacBook and other USB-C™ laptops. The hub expands your laptop or desktop connectivity by enabling you to connect both USB-A and USB-C devices through a single USB Type-C™ or Thunderbolt™ 3 port.

Expand your USB connectivity

Extend the life of your current USB 3.2 Gen 1 devices and take advantage of newer devices that feature USB-C.

This USB-C hub lets you expand your USB connection options using the USB-C port on your computer. It offers three USB-A ports and one USB-C port, so you can connect traditional USB devices as well as newer USB-C devices to your USB-C laptop.

Take it with you wherever you go

You can travel lighter, with a single USB-C adapter that lets you connect virtually any USB peripheral.

With its compact and rugged design, you can take this portable USB 3.2 Gen 1 hub anywhere you go. Because it’s so compact, it’s easy to tuck into your laptop bag and only takes up a small amount of desk space when you connect it to your workstation. The hub is ideal for use in hot-desk or BYOD (Bring Your Own Device) environments.

For portable applications, having the integrated host (USB-C) cable means one less thing to remember to carry with you.

Add four USB 3.2 Gen 1 ports in seconds

This USB-C expansion hub is multi-platform compatible, which means it will work with a wide range of operating systems such as Windows®, macOS, Linux® and Chrome OS™. It installs automatically once you connect it to your laptop, so you can be up and running in seconds.
