Viewsonic VBS200-A AV processor Black

Model: VBS200-A

Manufacturer: VIEWSONIC

EAN: 766907019469

Product Code: 1733441

R11,087

The ViewSonic ViewBoard Box (VBS200-A) turns any monitor, presentation display, or projector into a complete digital podium. Equipped with a performant quad-core CPU to extend the longevity of your hardware, the ViewBoard Box also features a great collection of myViewBoard apps for all your presentation, collaboration, productivity, and entertainment needs, ensuring more interactive meetings and lessons. Powered through PoE and boasting large connectivity options, the ViewBoard Box provides IT managers with an easy to setup remote management system for all compatible devices wherever they are, no matter the time of day.

Boost Learning and Engagement when Presenting

Transform compatible display into a powerful and interactive digital podium for all your productivity, communication, and entertainment needs. With access to the myViewBoard Suite in the familiar Android OS environment, it’s a breeze to share content, play multimedia files, present your ideas, or manage remote devices.

Complete Control Everywhere

Use the ViewBoard Box alongside the intuitive myViewBoard Manager software via RS232 command to broadcast tailored messages, schedule device operations, and gather data reports and metrics across all connected displays*. With built-in Wi-Fi 6, experience faster remote control over multiple displays, whether they are interactive flat panels, projectors, or monitors, even if these devices aren't equipped with the operating system. *Selected features are only available with the Advanced Manager license.

Convenient Browser-based Screen Sharing

Share your screen with myViewBoard Display without any complicated setup. This browser-based casting service supports instant sharing from compatible devices without additional cables or pre-downloaded apps.

Quick Content Sharing for Multiple Attendees

Simultaneously cast up to four devices using the ViewBoard Cast solution which is built into the ViewBoard Box. With its split, extended, and grouped screen capabilities, presenters are equipped with an array of new sharing possibilities, no matter the device.

Streamline Your Device Into a Complete Podium Solution

Offering multiple connectivity options, the ViewBoard Box doubles as a hub to link compatible peripherals and display devices. Expand control possibilities and draw or annotate your presentation in real-time while simultaneously showing it on another display.

A Truly Cable-free Experience

Powered via a standard IEEE 802.3af PoE (Power over Ethernet), the ViewBoard Box eliminates the need for a separate power supply, keeping spaces clutter-free. Simply plug in to enjoy faster internet speeds and power the ViewBoard Box at the same time.

Performance Right Out the Box
