Moza Racing MH16 Flight stick

Model: AS002

Manufacturer: MOZA RACING

EAN: 6973137270605

Product Code: 1734209

R3,780

The MOZA MH16 Flightstick, crafted from aviation-grade aluminum alloy with automotive-grade paint, offers exceptional durability and a classic fighter aircraft design. It features detachable modular components with pogo pin connections for easy installation and stable operation, providing additional switches without messy wiring. With 27 input signals and an 8-way ALPS thumbstick, the MH16 allows extensive customization through the MOZA Cockpit Control Software. Effortless plug-and-play compatibility ensures it fits most bases seamlessly, delivering a realistic and reliable flight experience.

Realistic and Durable

Every detail, from the grip design to the button layout, aims for perfect realism, precisely replicating the original aircraft's all-metal flightstick. Made from aviation-grade aluminum alloy with automotive-grade paint, it ensures durability, excellent mechanical performance, and thermal stability.

Classic Look

Honouring the iconic fighter aircraft control stick with a design that replicates its legendary look and feel, The MOZA MH16 flightstick evokes the adrenaline of a true fighter pilot.

Detachable Modular Components

Balancing classic and innovation, while maintaining high fidelity, the MH16 flightstick incorporates detachable expansion modules to optimize user needs, providing more switches that are extremely easy to install and remove by using pogo pin connections to avoid messy wiring and ensuring completely stable operation.

30 Input Signals

The switches can be mapped and assigned specific functions through MOZA Cockpit Control Software, allowing for the creation of personalized combinations.

8-way Switch

ALPS eight-way thumbstick caps are used for the hat switch, ensuring quality and reliability.

Easy Fit, Plug-and-Play

It effortlessly fits with most compatible bases, offering instant plug-and-play convenience.
