Smart home bridge SONOFF Bridge Max

Model: Bridge-M

Manufacturer: SONOFF

EAN: 6979033600461

Product Code: 1736545

R2,115

SONOFF Bridge Max smart home gateway

Connect various smart home devices into a single, cohesive system with the SONOFF Bridge Max gateway. The device functions as a Matter bridge and a Zigbee hub, enabling the integration of devices that use different communication standards and platforms. Support for Zigbee, BTHome, eWeLink, and Home Assistant allows you to create comprehensive automation solutions, while compatibility with Apple Home, Google Home, Amazon Alexa, and other Matter ecosystems makes it easy to manage devices from different brands.

Matter bridge – one ecosystem for many devices

The SONOFF Bridge Max enables you to connect Zigbee, BTHome, eWeLink, and Home Assistant devices to platforms that support the Matter standard. This allows different smart home components to work together within a single system, regardless of the manufacturer. The solution lets you create automations and control devices from within your chosen ecosystem, such as Apple Home, Google

Home, or Alexa.

An expanded Zigbee network for the smart home

As a Zigbee gateway, the device allows you to create a stable network for up to 128 Zigbee devices. You can connect sensors, switches, plugs, and other compatible home automation components to it. Thanks to its support for the Zigbee IEEE 802.15.4 standard, the Bridge Max serves as a central hub for device management and facilitates the creation of an extensive smart home system.

Local web interface—no cloud dependency

The Matter Bridge’s built-in web console allows you to access settings and manage the device directly over your local network. No app download, cloud account creation, or constant internet connection is required for setup. This solution provides more convenient access to the device’s features and allows for greater privacy when using your smart home.

Smart security and rapid response to threats

Bridge Max can work with Zigbee sensors and cameras to create automated security scenarios. If unusual activity is detected, the system can trigger an audible alarm with a volume of up to 90 dB and send real-time mobile notifications. This allows you to respond more quickly to potential threats and increase your home’s level of protection.

Integration with Home Assistant and advanced configuration

The device supports integration with Home Assistant via MQTT, allowing Zigbee devices to be synchronized with this popular home automation system. Bridge Max also allows you to connect Home Assistant devices to Matter ecosystems such as Apple Home, Alexa, and Google Home. This enables users to create more complex scenarios and tailor the system’s behavior to their specific needs.

Stable communication tailored to various setups

The SONOFF Bridge Max offers several communication methods, ensuring convenient adaptation to various setups. The device supports Wi-Fi in accordance with the IEEE 802.11 a/b/g/n/ac/ax standards and a wired network connection via a 10/100 Mbps RJ45 port, allowing it to operate in both wireless and more demanding network configurations. Additionally, the lightweight and compact housing, measuring 82 × 82 × 28 mm, makes it easy to place the gateway in any desired location indoors, and its construction from PC and ABS materials, along with USB-C power delivery, simplifies installation and helps maintain the aesthetic appeal of your home.

Included in the set

- SONOFF smart home gateway
- Ethernet cable
- USB-C cable
- Quick start guide

Manufacturer	SONOFF
Model	Bridge-M
Wireless connectivity	Wi-Fi IEEE 802.11a/b/g/n/ac/ax
Zigbee standard	IEEE 802.15.4
Network interface	RJ45 10/100 Mbps
Power connector type	USB-C
Input power	5 V 1 A
Number of supported Zigbee devices	Up to 128 devices
Net weight	83.4 g
Housing material	PC, ABS
Color	White
Dimensions	82 × 82 × 28 mm
Operating environment	Indoors
Operating temperature	-10°C to 40°C
Operating humidity	5–95% RH, non-condensing
Maximum operating altitude	Below 5,000 m
