

Netatmo Starter Pack - Smart Radiator Valves

Model: NVP

Manufacturer: NETATMO

EAN: 3700730501941

Product Code: 1736726

R4,390

Adjust the temperature of each room to suit your needs

Heat your home to just the right temperature, where and when you need it. With the answers to five questions about your heating usage Netatmo Smart Radiator Valves can create a comfortable, economical room-by-room heating schedule. Do you leave home at 9am and get back at 6pm? You can set the valves to turn up the heat in the bathroom before you get up, turn it down in your bedroom while you’re out, then turn it back up again for when you get home.

Smart features that save energy

Smart Radiator Valves are designed to save energy. Going on holiday? Activate the Absent or Frost Protection mode. Input your return dates so that the heating comes back on just before you get home. Airing a room? Equipped with Open Window Detection, Smart Radiator Valves automatically switch radiators off in rooms where windows are open.

Your heating system adapts to the weather, your home and each room

Netatmo Radiator Valves adapt to the weather and your home’s insulation in real time with the Auto-Adapt fonction. They adjust radiator heat to guarantee the right temperature at the right time. Want to set your living room to 20°C? Consider it done! If you have several Smart Radiator Valves in the same room, they can be synchronized to ensure the room is heated evenly.

Remote-controlled radiators

Wherever you are, control your radiators using the Energy app on your smartphone, tablet or computer. Sudden change of plan? You can use the app to reprogram your heating if you head home earlier than expected or decide to dine out last minute. Alternatively, you can set your Smart Radiator Valves manually once you’re home.

Effortless voice-controlled heating

Is it bath time for the kids? "Siri, turn up the bathroom temperature to 22°C!" Are your guests too hot? "OK Google, turn the heating down in the living-room to 18°C." Feeling chilly? "Alexa, make the bedroom 2 degrees warmer!" Thanks to Apple HomeKit, Alexa and Google Assistant compatibility, you can control Smart Radiator Valves with your voice. It’s no sooner said than done!

Simple to install and use

All Netatmo equipment is designed to be easy to install and use. It takes less than 20 minutes to install each Smart Radiator Valve. No technical expertise required: our step-by-step guides and videos walk you through the process. If you already have radiator valves, you can simply replace them with Netatmo Radiator Valves. You can even do it with the heating on!

Equipment adapted to your home

Netatmo Radiator Valves are compatible with more than 90% of all radiators. Still not sure? Check your compatibility on check.netatmo.com. The collective heating pack comes with several adapters

to make sure they fit your thermostatic valve bodies. Don’t have the right model? Visit our online store to find the one you need.

Designed to blend into your home decor

The Smart Radiator Valves are designed to make your life easier - not harder! With a minimalist design by Philippe Starck and a choice of four adhesive strips in different colors, your Netatmo Radiator Valves blend into your home decor.

Easy-to-use tools keep track of your energy usage

You have all the tools you need to track your energy usage. View your data history with associated charts on your smartphone or computer. Indoor temperatures, heating instructions, radiator activity phases – the info is all at your fingertips.

Control every radiator for even greater efficiency

The Netatmo pack for collective heating comes with two Smart Radiator Valves. You can add up to 20 Smart Radiator Valves in total on the radiators of your choice. You’re free to set the temperature of every room in your home depending on when and how you use it.
