HiBREW G7 Electric Glow Coffee Grinder

Model: G7-silver

Manufacturer: HIBREW

EAN: 6975702150954

Product Code: 1737560

R3,327

HiBREW G7 Electric Glow Coffee Grinder

The HiBREW G7 is an electric filament grinder that allows you to precisely grind your beans and have full control over the degree of grinding. With a 48-step thickness adjustment, you can customize the beans for a variety of brewing methods, from espresso to French Press. Conical stainless steel grinds ensure even grinding and protect the beans from overheating to preserve their full flavor. The electronic touch panel makes it easy to set the grinding time, and the use of anti-electrostatic technology minimizes coffee loss and makes it easy to keep clean.

Precision to suit any brewing method

The ability to choose from 48 levels of grinding thickness allows you to customize your coffee for different brewing methods. Lower settings (0-16) are ideal for espresso, medium (16-32) will work well for pour-over methods, and high settings (32-48) will be suitable for French Press. Adjustments are made in 0.02 mm increments, ensuring maximum precision and repeatability. Such a scale

allows you to experiment with the beans and adjust their structure for optimal extraction, which directly affects the taste of the coffee.

Grinding without losing flavor

The HiBREW G7 grinder uses conical 420 stainless steel grinds with a diameter of 48 mm, which ensure precise and even grinding of the beans. Their design reduces the heating of the coffee, which preserves its full flavor and aroma. As a result, the ground beans retain optimal extraction properties, which is crucial for the quality of the brew. The durable material ensures that the grinds stay sharp for a long time, which translates into reliability and efficiency.

Intuitive operation and precise settings

The HiBREW G7 features an easy-to-read touchscreen panel that allows you to set the grinding time from 1 to 40 seconds, allowing you to precisely dispense the amount of coffee. The device supports three grinding modes, compatible with portafilters with diameters of 51 mm, 54 mm and 58 mm, ensuring wide compatibility with cob coffee makers. Note: the portafilter is not part of the kit.

No more coffee spills

During grinding, coffee particles can settle on the walls of the grinder or spill on the countertop. The HiBREW G7 uses static elimination technology to ensure that ground coffee goes exactly where it should - into the portafilter or container. In addition, the chute channel, which is inclined at a 20° angle, makes it easier to precisely transfer the ground beans, eliminating the mess. The machine also features a Blowing Hopper function that removes coffee residue after grinding, making it easier to clean and ensuring maximum freshness for the next batch.

Quiet and energy-efficient operation

The machine uses a high-torque direct current (DC) motor that ensures stable and even grinding. Compared to standard motors, this model features quieter operation (5-15% noise reduction) and an extended service life of 20-30%. In addition, the use of speed control technology allows you to adjust the intensity of grinding, resulting in greater precision and better coffee quality.

Ease of cleaning

After grinding is complete, coffee residue can remain in the grinder, affecting the taste of subsequent batches. The HiBREW G7 features the Blowing Hopper system, which allows the residue to be quickly and efficiently removed from the grinding chamber. The solution used makes cleaning easy and ensures that each subsequent batch of coffee is fresh and free of residue from the previous grinding.

Rugged construction

The HiBREW G7 is equipped with a 160g bean hopper, which allows the machine to grind more coffee without the need for frequent refilling. This makes the device suitable for both daily home use and preparing larger quantities of coffee for guests. The housing is made of high-quality stainless steel, which ensures durability and scratch resistance.

Manufacturer	HiBREW
Model	G7
Dimensions	115 x 180 x 350 mm
Weight	2.5 kg
Standards	GB 4706.1-2005, GB 4706.30-2008

Gross weight: 2840, Net weight: 2500, Box length: 41,00, Box width: 24,00, Box height: 15,50, Last delivery: 16.11.2026, Model: G7-S, Purpose: mielenie kawy, Stan: Nowy, Stan opakowania: oryginalne, Kod producenta: G7-S, Brand: HiBREW, Kolor dominujący: srebrny, Moc: 150, Functions: regulacja stopnia rozdrobnienia/ regulacja ilości mielonej kawy, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_others.pdf, Mechanizm mielący: żarna
