

GENESIS Diaxid 605F Midi Tower Black

Model: NPC-2046

Manufacturer: GENESIS

EAN: 5901969439212

Product Code: 1737576

R1,991

Durable, elegant, efficient. In a nutshell? GENESIS Diaxid 605F. Meet the case we created for fans of low temperatures and high performance. Compatibility with AIO 420 coolers, up to 5 GENESIS Oxal 120 fans and full dust filtering. On top of that, extensive mounting options for components. Take up the challenge and see how easy it is to build your dream computer with GENESIS Diaxid 605F.

UP TO 5 GENESIS OXAL 120 FANS

Meet the GENESIS Oxal 120 - our most efficient fans, which will provide the performance of a standard fan (1400 RPM) already at much lower speeds. What does this mean for you? Silence and optimal temperatures even on the hottest days. You'll find as many as 3 of them (pumping air inside) in the front, while the other 2 (exhausting) in the back. Thanks to this configuration, you can count on positive pressure inside the case, which, combined with full filtering, protects even better against dust. Not enough? Additional space on the top and 2 spaces on the bottom of the case will allow you to easily expand the unit as you wish (including mounting up to 3 140 mm fans on the front).

COMPATIBILITY WITH AIO 420

Are you looking for a case that gives you full freedom to mount a one-piece water cooler? With GENESIS Diaxid 605F you will see how easy it is. The front of the case will allow you to mount AIO 420/360/280/240/120 kits (including a radiator thickness of up to ~27 mm on the front in the case of AIO 420). On the top, in turn, you can count on mounting AIO 280 with a standard radiator (~27 mm) or "thicker" AIO 240/140/120 (with ~38 mm radiator). Also, the back will allow you to mount a classic AIO 120, simply and quickly.

WITH A VIEW TO THE POSSIBILITIES

GENESIS Diaxid 605F is a model that we created with the possibility of building high-performance units in mind. This means not only excellent cooling properties, but also the ability to mount components in a fully thought-out way. Compatibility with ATX, microATX, mini-ITX boards, 2 slots for 2.5" SSD media, 1 slot for 3.5" HDD and 1 hybrid 2.5"/3.5" slot. Plus graphics cards with a maximum length of ~351 mm and tower coolers with a height of ~168 mm. Bet on a case that meets your expectations.

GET RID OF THE DUST

With GENESIS Diaxid 605F you don't have to worry about dust. Magnetic filters located on the top and bottom of the case will protect your components from it. If necessary, you can easily wipe them with a damp cloth, getting rid of dirt in just a few seconds. The whole thing is completed by the front mesh panel, whose mesh is smaller (~0.8 mm) than in standard filters. Larger density means the benefits of better filtering properties and less dust inside.

FUNCTIONALITY IS HER 2ND NAME

Do you use USB ports and care about functionality? Great deal. On the top of the GENESIS Diaxid 605F you'll find not only a modern USB-C port (Gen 2 up to 10 Gbit/s), but also 2 × USB Type A (3.2 Gen 1). You'll also effortlessly plug in an audio kit with a separate input for audio and microphone (2 × 3.5 mm). Numerous grommets, a basement and rubber grilles are the elements that make the GENESIS Diaxid 605F functional inside. Thoughtful and aesthetically pleasing component installation has never been so easy.
