

ACT Aero 4K Wireless Presentation System

Model: AC7960

Manufacturer: ACT

EAN: 8716065589399

Product Code: 1738830

R9,974

The Aero 4K Wireless Presentation System is a solution for seamless content sharing on HDMI screens during face-to-face meetings. Connect the wireless presenter button to your laptop’s USB Type-C® port and present your content with just one click. Your content is now being shared on the HDMI screen that is connected to the Aero’s base station. The Aero is specially designed for multi-user collaboration, allowing up to 16 presenter buttons to be connected to the base station. The split-screen function enables two laptops to be presented simultaneously. In short, the Aero 4K Wireless Presentation System is as easy as connect – click – present.

Connect – click – present in 4K

Share your laptop’s content on a 4K HDMI screen with the plug and play AC7960 Aero 4K Wireless Presentation System. The AC7960 includes the Aero base station and one Aero presenter button.

This starter kit includes everything needed to get started with wireless presenting.

Setup the base station and connect the USB Type-C® presenter button to your laptop. Click the button and your screen will be shared on a 4K monitor or TV. It’s as easy as that.

Multi-user collaboration with full screen or split screen

The Aero base station can connect up to 16 wireless presenter buttons. Switching between the presenters is easy.
To activate the second presenter, this presenter presses and holds the button to become the leading presenter.
To activate the split-screen, the other presenter clicks the button briefly and the content will be displayed side by side.

Touch screen and mouse support for Windows

For HDMI monitors with touch control functionality, simply connect the screen to the base station and control the presenting laptop using touch control. Additionally, a mouse can be connected to the base station using a dongle or USB cable.

Supports screen casting for Apple, Android and Windows

The AC7960 is compatible with a wide range of devices and supports screen sharing for Apple, Android, and Windows operating systems. Please consult your device’s manual to confirm that screen sharing is supported by your specific device.

What is inside of the box of a wireless presentation system?

The AC7960 Aero 4K wireless presentation system comes out-of-the-box as a complete starter set, which includes:
