Conceptronic EBM01R72V External Battery Enclosure is designed to support UPS runtime expansion when used with compatible batteries, providing flexible backup power extension for critical equipment during power outages.

This battery enclosure is compatible with ZEUS51E3K online UPS systems and is designed for use with 72V UPS architectures. It supports servers, network devices, and other essential equipment that require longer runtime during power interruptions.

The enclosure is designed to accommodate twelve 12V 9Ah batteries and uses a GPS40 battery connection for secure and stable integration. With a rackmount-type design, it supports structured rack deployments for scalable UPS runtime expansion.
