

Epson EH-LS7500 Short throw projector 3500 ANSI lumens 3LCD UHD 4K (3840x2160) Black, White

Model: V11HC36040

Manufacturer: EPSON

EAN: 8715946749396

Product Code: 1739262

R74,494

The EH-LS7500 is a versatile 4K projector for movies, TV, gaming, sport and indoor golf simulation. Its short-throw design delivers a large-screen experience in compact spaces, while 3LCD, AI image enhancement and a laser light source produce bright, natural images. Smart Matter compatibility and flexible positioning make premium home entertainment and golf simulation easy.

Short-throw design for flexible home setups

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The short-throw lens delivers large images from a shorter distance, making it ideal for dedicated home golf simulators, media rooms and smaller living spaces. Whether practising your swing or watching the latest blockbuster, you'll enjoy immersive big- screen experiences without needing a long projection distance.

Premium big-screen entertainment meets home golf simulation

From movie nights in the living room or dedicated home cinema to immersive indoor golf simulation in the garage, the EH-LS7500 adapts to the way you use your home.
With stunning 4K picture quality and images up to 500 inches, it's the ideal projector for films, TV, live sport, gaming, and golf simulation.

Natural colours that stay true to the original

3LCD technology and high Colour Light Output deliver accurate colour reproduction to create bnght, vibrant and natural- looking images.
With no rainbow effect, every scene remains comfortable to watch and play, whether you're enjoying a film, watching live sport, gaming with friends or practicing your swing.

Intelligent image optimisation

Built-in Al image enhancement continuously analyses content and adjusts picture quality in real time. The result is improved detail, smoother motion and enhanced contrast across a wide range of entertainment, helping every scene look its best with minimal user adjustment.
