Product Code: 1739346

R3,985

Elevated comfort, Enhanced productivity

ASUS USB-C Stand Dock is a sleek and ergonomic 10-in-1 docking station designed for enhanced productivity. It serves as an adjustable stand, elevating laptops to an ideal position for comfortable viewing. A pair of HDMI® ports help extend screens across two 4K 60Hz displays, while four high-speed USB Type-A ports, 100W of charging power, and additional connectivity options transform any setup into an extremely versatile workstation.

DESIGN

Ergonomic comfort

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The ergonomic ASUS USB-C Stand Dock offers two adjustable elevated positions for comfortable viewing.

PRODUCTIVITY

Dual 4K visuals

Two HDMI 2.0 ports enable ASUS USB-C Stand Dock to support up to two 4K 60Hz displays for seamless, efficient multitasking.

CONNECTIVITY

Multi-device connections

A comprehensive array of ports makes it easy to keep essential devices connected. Four high-speed USB Type-A ports, a USB Type-C® port, and a Gigabit Ethernet port seamlessly link peripherals and networks for streamlined workflows.1

SPEED

Fast transfers, powerful charging

Experience up to 10Gbps data transfers with USB 3.2 Gen 2 technology for seamless and efficient workflows. With up to 100W power delivery, ASUS USB-C Stand Dock keeps any connected laptop powered and ready for uninterrupted productivity.

SMART CONTROL

One-button wake-up & IT Management

With ASUS USB-C Stand Dock, it takes just one tap to wake a laptop and all connected displays — because the dock’s power button precisely mimics that of the laptop2. It also enables IT departments to remotely wake laptops that are in standby mode to apply updates and more, helping speed up routine admin and maintenance tasks.

One-button wake up

Pressing the dock’s power button wakes up the laptop and connected monitors.

Remote IT management

Wake-on-LAN (WoL), MAC Address Pass Through, and PXE can be enabled through the DC310 LAN port to allow easy remote device management.
