With HDR tone mapping and SSI Dynamic Black technology, simply adjust light intensity* and adapt brightness to the images, and intricate details emerge from the shadows.
(*Activated in Dynamic mode)

Vivid Cinematic Colors

With 4LED high brightness, vibrant hues, and 84% of the DCI-P3 color space, the X500i is ready to get you enveloped in vivid cinematic colors of gaming universes.

Spatial Audio for Precision Gaming

Sense every in-game shift through pinpoint sound placement, from explosive blasts to tranquil moments.

Step into a new dimension of gaming audio with BenQ’s CinematicSound technology. Utilizing MAXXAudio DPS dynamic enhancement and a symmetrical speaker placement design, it crafts a lifelike 3D audio realm, immersing you in every game.

Transform into a Game Battlefield

Effortlessly transform your bedroom or small living room into a gaming space with the X500i immersive gaming projector. Featuring 2200 ANSI lumen high brightness and a short-throw design suitable for dimly lit compact rooms, X500i is perfect for projecting large images even in compact spaces.

Confined Space, Flexible Projection

With a throw ratio of 0.69~0.83 and 1.2x zoom, you can customize screen sizes to fit various spaces effortlessly and project a captivating 95” screen from just 1.44m for expansive entertainment viewing. All without the hassles of complicated installation.

Digital Zoom

Embrace a wider view and effortlessly resize the projected image thanks to digital zoom. All-encompassing gaming is now showing right in front of you without any blind spots or view-
