Elevate visual fidelity with quantum dot technology, offering a spectrum of colors as vast as the cosmos. The display's true 10Bit depth, alongside the DCI-P3 99% color gamut, now shines with quantum dot vibrancy, delivering cinematic quality that rivals the real world.

EXPANSIVE ULTRAWIDE PANORAMA WITH PIP/PBP

The UltraWide 32:9 aspect ratio of the Predator X49 QD-OLED now comes with advanced PIP/PBP functionality. This allows you to simultaneously display two video sources on one screen, enhancing your workflow and gaming strategy with quantum dot vibrancy, all within the monitor's expansive canvas.

FLUID QUANTUM MOTION

Flow through gaming universes with a 240Hz1,2 refresh rate on a quantum dot OLED screen, ensuring that each frame is as smooth as it is bright. The swift 0.03ms response time means your gameplay is as immediate as it is radiant, with no detail lost in motion.

CURVATURE MEETS QUANTUM CLARITY

The 1800R curvature is now supercharged with quantum dot clarity, creating an immersive cocoon that not only surrounds but also dazzles with deep contrast and heightened luminance, drawing you deeper into your games and media.

ULTIMATE CONTROL HUB

The Predator X49 QD-OLED stands as your command center with an integrated KVM switch, allowing seamless transitions between different machines. The array of ports, including USB Type-C with 90W power delivery and a USB 3.2 hub, ensures your desk remains a temple of productivity and power. This is where convenience meets the future of gaming infrastructure.

VISIONCARE 2 AND EYESAFE 2.0: THE HUMAN FIREWALL

Even as we evolve with technology, your health remains a priority. Eyesafe 2.0 shields you from the unyielding glare of a society forever online. VisionCare 2 also provides a suite of features to put less strain on your eyes.
