

Zebra RS5100 Wearable bar code reader 1D/2D Laser Black

Model: RS51C0-TEDNWR

Manufacturer: ZEBRA

EAN: 8596375210110

Product Code: 1740075

R20,488

THE ‘GO-EVERYWHERE’ FEATHERWEIGHT AND RUGGED RING SCANNER

Finally, there’s a ring scanner that’s designed for use in customer-facing areas, as well as your warehouse and distribution center — the RS5100 next-generation ring scanner. It’s practically weightless, and so small your customers won’t even notice it. There’s a wearing option that will bring comfort to every worker. Best-in-class scanning enables instant capture of virtually every barcode at twice the range of legacy Bluetooth ring scanners. The rugged design outshines competitive devices. And a long list of features provides unsurpassed versatility and flexibility.

SUPERIOR ERGONOMICS FOR SUPERIOR COMFORT

At just over two ounces and two cubic inches, it’s practically weightless (about 1/2 the size and weight of the legacy RS507x ring scanner). Wear it on a finger, the back of a hand or on a lanyard. The single-sided trigger model accommodates gloves; the double trigger model lets workers switch hands on the fly. And the top-mounted trigger on both models allows rotation of the RS5100 to the side of a finger for near-zero protrusion.

INDUSTRY-LEADING RUGGED DESIGN

You get a best-in-class rugged design with a drop, tumble and IP sealing specification — so you can count on reliable operation despite drops, bumps, dust and even a high-pressure hose down. The long-life trigger handles millions of actuations. And the RS5100 is built to handle the high levels of electrostatic discharge common with use on concrete flooring.

BEST-IN-CLASS SCANNING

Two scan engine options allow you to choose the imager that best matches your scanning and aimer requirements — LED or laser. Both imager engines deliver first time capture of even damaged, dirty and poorly printed 1D/2D barcodes through PRZM Intelligent Imaging, a megapixel sensor and superior algorithms — plus a wide field of view for easy capture of large barcodes. In addition, the two imagers can scan barcodes twice the distance as the legacy RS507x ring scanner.
