AMZCHEF CE-HS-200S-SV Blender

Model: CE-HS-200S-SV

Manufacturer: AMZCHEF

EAN: 9331911053078

Product Code: 1740151

R3,884

AMZCHEF CE-HS-200S-SV Blender

The AMZCHEF CE-HS-200S-SV blender is equipped with a motor rated at 1600 W and capable of up to 1800 W, a 6-blade blending system, 9 speed settings, and 5 automatic programs. The appliance is ideal for preparing smoothies, frozen fruit shakes, sauces, dips, and peanut butter, and its high power also allows for quick ice crushing. Operation is made easy by a digital LED display, a speed control knob, and a PULSE function.

6 blades for effective blending

The six-blade system allows for thorough blending of both soft and harder ingredients. Combined with a powerful motor, it enables the preparation of drinks and dishes with a uniform, smooth consistency. The blender can also handle frozen fruit and ice cubes, making it ideal for preparing cold smoothies and desserts.

9 speed settings and PULSE mode

The dial lets you select one of 9 speed settings and adjust the intensity to suit the type of ingredients. Lower settings facilitate controlled blending of more delicate ingredients, while higher speeds are ideal for intensive chopping. The PULSE function operates the blender in short bursts, providing additional control—for example, when crushing ice.

5 Automatic Programs and Convenient Controls

The blender offers 5 preset programs designed for various uses. The automatic modes reduce the need to manually adjust settings for the most commonly prepared dishes and beverages. The digital LED display shows the time and speed, while the POWER and PULSE buttons provide quick access to the appliance’s basic functions.

A jug with a capacity of approximately 2 liters

The jug, with a capacity of approximately 2 liters, allows you to prepare a larger quantity of beverage in a single blending cycle. This is a practical solution when making smoothies for several people. The Advanced Flow Design promotes the circulation of ingredients inside the jar and directs them toward the blades, allowing the mixture to be blended more evenly. The jar is made of BPA-free material and is food-safe.

For smoothies, sauces, spreads, and frozen ingredients

The AMZCHEF CE-HS-200S-SV can be used to prepare classic smoothies, breakfast shakes, frozen drinks, dips, sauces, and creamy spreads, including nut butters. The adjustable speed allows you to tailor the blending process to different ingredients and the desired consistency.

Dimensions and Operating Principles

The blender is approximately 21.4 cm wide, 19.4 cm deep, and 43.2 cm tall with the blending jar attached. The appliance is designed for a power supply voltage of 220–240 V at a frequency of 50–60 Hz. The maximum continuous operating time per cycle is 3 minutes; allow the appliance to rest for at least 2 minutes before starting the next cycle.
