AURZEN Zip Projector (Gray)

Compact, slim, and extremely powerful, the AURZEN Zip lets you take the cinema with you wherever you go. The built-in 5000 mAh battery, power bank support, and fast PD charging give you freedom of operation, while vertical full-screen mode and instant cloning without Wi-Fi make it easy to view content from various devices. Plus, you get access to popular streaming platforms and are ready for screenings at home or under the open sky.

Slim construction and refined design

The set features an ultra-slim speaker and a thin 5000 mAh battery, resulting in a sleek, elegant enclosure without compromising on functionality. However, its slim form does not mean fragility – it is a well-thought-out, robust device designed for everyday use, both at home and outside.

Small size, big possibilities

Despite its compact size, the AURZEN Zip provides an impressive visual experience, allowing you to turn any space into a private cinema. In Eco mode, the projector offers up to 1.5 hours of playback on a single charge, which is ideal for watching a movie, giving a presentation, or enjoying your favorite content in the evening. An additional advantage is its compatibility with power banks, allowing you to extend the device's operating time even when you are away from a power outlet. Support for PD fast charging and the ability to charge while in use mean that the projector is ready for action almost without interruption. Note: a 24W or higher adapter is required for fast charging.

Vertical full-screen mode – ideal for reels and shorts

AURZEN Zip offers vertical full-screen content display without annoying black bars on the sides. This solution is designed for modern video formats such as reels and shorts, which dominate social media. This allows you to comfortably view vertical content in a large format without having to rotate the device or compromise on image quality.

Instant cloning without Wi-Fi

One of the key features of AURZEN Zip is Instant Mirroring, which allows you to instantly clone your screen without having to connect to a Wi-Fi network. The projector works with iOS, Android, Windows, and macOS, giving you broad compatibility with the most popular mobile devices and computers. Please note that the projector is not compatible with Pixel phones or Chromebooks.

Unlimited entertainment with CastPlay

With CastPlay, you can access popular streaming platforms such as Netflix, Disney+, YouTube, and Prime Video and enjoy your favorite movies and TV shows on the big screen (streaming adapter sold separately). Additionally, iPhone and Mac users will need an HDMI adapter to take full advantage of streaming capabilities. This solution offers flexibility but requires additional equipment depending on the hardware used.

Clear image with DLP technology

The use of DLP technology translates into sharper details and more precise image reproduction. The brightness of 100 ANSI lumens allows for comfortable viewing in various conditions, and the 720p

resolution ensures a clear, detailed image during movies, TV series, and presentations. The 300:1 contrast ratio emphasizes the differences between light and dark areas of the scene, giving them greater depth. As a result, every viewing experience gains in quality, despite the compact size of the device.

Flexible foldable design

The thoughtful design allows you to position the projector at almost any angle, making it easy to adapt to any space and usage scenario. Whether you're watching a movie on the living room wall, the bedroom ceiling, or outdoors, the ability to adjust to virtually unlimited angles gives you complete freedom of placement. This solution eliminates the need for additional tripods and stands, increasing mobility and convenience.
