AURZEN Castplay Wireless HDMI Adapter

Aurzen CastPlay is a compact HDMI adapter that allows you to wirelessly transmit Full HD video and audio from a wide range of devices, including computers, laptops, consoles, set-top boxes, and cameras. It supports 4K signals, provides smooth transmission up to 30 meters, and is DRM-compliant, allowing you to watch content from popular streaming platforms such as Netflix, Disney+, and HBO Max. It works in plug-and-play mode, offering simple and fast operation.

Ready to use right after connecting

CastPlay does not require installing an app, connecting to Wi-Fi, or configuring Bluetooth. Just connect it to your image source and projector – everything works in plug and play mode. This saves time and eliminates connection problems, especially when you need to quickly start a presentation

or movie.

Full HD image quality with 4K support

The adapter supports 4K decoding and displays images in 1080p at 60 frames per second. This translates into a smooth, sharp, and detailed image – without delays or compression. It is ideal for watching movies, playing games, or conducting video conferences. If your computer or console does not provide sufficient power via HDMI, the transmitter can be additionally powered via the microUSB port (5V/1A).

Stable connection up to 30 meters

The adapter operates in two bands – 2.4 GHz and 5 GHz – ensuring fast signal transmission even over longer distances. In open space, the range reaches up to 30 meters, and even if the signal has to pass through walls, the connection remains stable.

Screen mirroring and extension

CastPlay not only allows you to simply mirror your image, but also to extend your desktop – i.e., display a separate screen on a projector or monitor. This is very useful at work, for example, when you want to present data and take notes on the main screen at the same time. Changing modes is quick and intuitive.

Compatibility with a wide range of devices

The adapter works with laptops, desktop computers, game consoles (PS4, PS5, Xbox, Switch), and TV boxes. Combined with the ZIP projector, it creates a compact, wireless projection set that works well at home, in the office, at school, and outdoors. If you use Apple equipment, all you need is a Lightning to Digital AV adapter with HDCP support to take full advantage of CastPlay.

Included

- Wireless HDMI adapter
- User manual
