Aurzen Eazze D1 Max Projector

Model: AU-PJ-AD003U-EUBW0

Manufacturer: AURZEN

EAN: 6978642440383

Product Code: 1740312

R8,041

Aurzen Eazze D1 Max Projector

The Aurzen D1 Max is a modern projector designed for viewing content in a variety of settings—from home theaters to outdoor screenings. Equipped with a Google TV system based on Android TV 14.0, it offers quick access to popular apps and convenient voice control. High brightness, MEMC technology, and built-in Dolby Audio speakers create a comprehensive solution for everyday use without the need for additional equipment.

Image tailored to the location and time of day

The projector offers several brightness levels, making it easier to adjust the image to the surrounding conditions. In outdoor mode, it reaches up to 1000 ANSI lumens, allowing for use outdoors or in partially lit environments. In home theater and bedroom modes, brightness is lower, making it ideal for evening viewing and reducing eye strain. Brightness has also been verified by SGS certification, which confirms the device’s actual performance, ensuring that the stated values are not overstated and better reflect real-world usage conditions. An image with a diagonal of up to

200 inches fills both smaller rooms and larger spaces well.

Smooth image and improved motion clarity

MEMC technology improves the smoothness of dynamic scenes, which is important when watching sports or action movies. Motion is more stable, and details do not blur in fast-paced shots. Combined with high brightness, this results in a clearer image across various applications, regardless of the pace of the content being displayed.

Google TV system and extensive access to content

Thanks to Google TV, users have access to many popular apps, such as Netflix, YouTube, Disney+, Prime Video, and Apple TV. The system runs smoothly and also offers access to hundreds of free channels, expanding the projector’s capabilities without requiring additional subscriptions. The built-in Google Assistant enables voice control, simplifying operation and allowing for faster searches for content of interest.

Audio and picture-off mode

The built-in 2 × 10W speakers with Dolby Audio support deliver clear and rich sound when watching movies or TV shows. The projector can also operate in "screen off" mode, where the image is turned off but the sound continues to play. This feature is ideal for listening to music, podcasts, or radio shows when the screen isn’t needed.

Stable connectivity and flexible options

Dual-band Wi-Fi support (2.4 GHz and 5 GHz) enables stable content streaming without interruptions or loss of quality. Two-way Bluetooth allows you to connect external speakers or headphones, as well as use the projector as an audio source for other devices. This makes it easier to adapt the device to various usage scenarios.

Features that enhance user convenience

The projector is equipped with a PIN lock that helps secure access to accounts and settings, which is particularly important when used by multiple people. Parental control features are also available, allowing you to restrict access to specific content and set usage time limits. Additionally, the remote control’s battery level is displayed on the screen, making it easier to monitor its status and preventing unexpected power loss.

Easy maintenance and longer lifespan

The one-button optical cleaning system helps remove dust from inside the projector. As a result, the image remains clear for longer, and the device itself requires less maintenance. This solution is particularly effective when the equipment is frequently moved or used outdoors.

Modern and practical design

The projector’s housing features a subdued color scheme with a metallic front, giving it a modern look. The perforated sides aid cooling while also improving sound distribution. The entire unit is designed to blend seamlessly with both home interiors and commercial spaces.

Included

- Aurzen EAZZE D1 MAX projector
- Power cord
- User manual
- Remote control

Manufacturer	Aurzen
Model	Ezze D1 Max
Display technology	LCD
Light source	LED
Operating system	Google TV 14.0
RAM	2 GB
Internal storage	8 GB NAND Flash
