Aurzen Eazze D1 Pro Projector

The Aurzen Eazze D1 Pro projector is a compact device designed for home entertainment—from watching movies and sports events to gaming and listening to music. It offers native Full HD resolution, 4K support, and built-in speakers with Dolby Audio technology. Thanks to Bluetooth connectivity, multiple ports, and a convenient mobile app, the projector can be easily adapted to various devices and spaces in your home. It’s the perfect solution for those who want to create their own home theater without a complicated setup.

Full HD image ready for the big screen

The projector displays images in native 1080p resolution, which translates to sharp details and vivid colors when watching movies, TV shows, or sports broadcasts. The device also supports 4K signals, so it can easily play high-quality content from modern sources. With a brightness of 350 ANSI lumens, the projector can be used in both dimly lit rooms and well-lit living rooms.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Large image tailored to the room

The Aurzen Eazze D1 Pro can display an image with a diagonal of up to approximately 200 inches. The 50–100% zoom function allows you to adjust the projection size to the available space without having to reposition the projector. This makes it ideal for use in a bedroom, a larger living room, or during outdoor screenings.

Dolby Audio speakers with Total Sonics technology

The projector is equipped with two 10-watt speakers, supported by Dolby Audio technology and a DSP audio processing system. This combination delivers a more balanced and dynamic sound that better adapts to the content being viewed. In practice, this means clearer dialogue, a wider stereo soundstage, and deeper bass when watching movies or listening to music.

Stable sound without sudden volume changes

The DSP technology automatically adjusts the volume level and enhances sound quality. As a result, the projector reduces sudden volume spikes between scenes, commercials, or different signal sources. This makes for a more comfortable viewing experience without the need to constantly adjust the volume.

Bluetooth connectivity and wireless convenience

The projector supports two-way Bluetooth connectivity, allowing you to stream audio to wireless speakers and use the projector as a speaker for your smartphone. This solution lets you quickly connect various devices and create a convenient entertainment system without a tangle of cables.

Multiple ports for connecting devices

The Aurzen Eazze D1 Pro is equipped with a set of popular connectors that make it easy to connect various video sources. Thanks to the HDMI port, you can connect a laptop, game console, or media player, while the USB ports allow you to play content directly from portable storage devices. Additionally, AV connectors and a headphone output are available.
