Aurzen Castplay Pro Wireless Adapter

The Aurzen Castplay Pro Wireless Adapter is a compact device that lets you quickly stream content from your phone, tablet, or laptop to a larger screen. Thanks to its wireless connection, you can comfortably watch movies, presentations, or photos on your TV or projector without using any cables. Just plug in the adapter and start streaming—this solution works perfectly both at home and at work.

Simple Connection – Plug & Play

The Aurzen Castplay Pro operates in plug-and-play mode, meaning it requires no complicated setup or installation of additional apps. Once connected, you can immediately start streaming content to a larger screen. This makes the adapter easy to use even for those who haven’t used similar solutions before.

Wireless content streaming

The adapter allows you to stream content from mobile devices and computers to a TV or projector. In practice, this means you can watch movies from popular streaming services, view photos and videos, or give presentations without having to connect long cables. Wireless transmission provides greater freedom of use and keeps your workspace or entertainment area tidy.

Wide device compatibility

The Aurzen Castplay Pro works with many popular devices equipped with a USB-C port that supports video transmission (DisplayPort Alternate Mode). The adapter is compatible with, among others, select iPhone models, Samsung Galaxy and Google Pixel smartphones, as well as MacBook laptops and iPad tablets with a USB-C port. The device also supports the Nintendo Switch and Switch OLED consoles, allowing you to stream video from the console without using a traditional docking station.

Simultaneous charging and video transmission

While using the adapter, you can simultaneously charge the device from which the video is being transmitted. This feature allows you to watch movies, play games, or give presentations without worrying about your smartphone or laptop battery draining quickly.

Compact and lightweight design

The Aurzen Castplay Pro is designed to take up as little space as possible. Its small size and weight of approximately 27 g mean the adapter fits easily in a pocket, bag, or backpack. This allows you to always have it with you and use it at home, in the office, or while traveling.
