AURZEN Boom mini Case Bundle Projector

The AURZEN BOOM mini Case Bundle is a compact multimedia projector designed for convenient viewing of content on a large screen at home or outdoors. The device runs on Google TV, providing direct access to thousands of streaming apps without the need to connect additional devices. The projector offers 500 ANSI lumens of brightness and HDR10 technology to enhance contrast and image detail. The use of ToF technology enables automatic focusing and real-time image correction, allowing the device to be set up in just a few seconds. The package is rounded out by built-in 20W speakers with Dolby Audio support and extensive wireless connectivity options. The set includes a protective case.

Built-in Google TV system and extensive connectivity options

The projector is equipped with the official Google TV system, which allows access to over 10,000 apps and streaming services, such as Netflix, YouTube, Disney+, and Hulu. This eliminates the need

for users to connect an additional device like a TV Stick. The built-in 2 GB of RAM and 16 GB of internal storage ensure smooth app performance and stable content playback. Additionally, the device supports two-way Bluetooth, allowing it to function as both an audio source and a speaker. Dual-band Wi-Fi (2.4 GHz and 5 GHz) ensures stable image transmission and fast access to streaming services. The Google Cast feature enables wireless content streaming from Android and iOS smartphones.

Full HD image with 4K signal support

The AURZEN BOOM mini projector uses a panel with a native resolution of 1920 × 1080 (Full HD). The device supports 4K input via HDMI, but the image is displayed at a native resolution of 1080p. According to the manufacturer, playing 4K content requires connecting an external device, such as a TV stick or media player. The source device then downscales the 4K content to 1080p before sending the signal to the projector. This solution allows you to enjoy 4K content available on streaming services while maintaining compatibility with the projector’s Full HD display.

Automatic image adjustment in 3 seconds

The projector uses ToF (Time of Flight) technology, which enables automatic focusing and real-time keystone correction. The system operates in approximately 3 seconds and responds even to slight movements of the device, keeping the image sharp and properly aligned with the projection surface at all times. Automatic screen alignment and obstacle detection features further simplify setup.

Built-in 20 W audio system with Dolby Audio

The projector features a dual 20 W speaker system with Dolby Audio support. The Visible Sound design with a rear speaker layout delivers clear highs and deep bass with minimal distortion. This allows the projector to also function as a standalone Bluetooth speaker.

Adjustable design and user comfort

The projector housing is designed with a tilt angle of up to 110°, allowing you to easily adjust the projection direction to suit the device’s placement. Soft light diffusion technology reduces eye strain during extended viewing, making the projection experience more comfortable than watching

traditional TV. The included case allows for convenient storage and safe transport.

Protective case included

The included protective case is made of durable EPP foam, which is 100% recyclable, combining effective protection with a more environmentally conscious approach. Its precisely tailored design fits the BOOM mini projector perfectly, keeping the device securely in place and protecting it from damage during transport and storage. The lightweight and compact design makes carrying the projector convenient and hassle-free, while its water-resistant properties protect the equipment from accidental splashes or light rain.

Included

- Projector
- Protective case
- Remote control (batteries not included)
- Power adapter
- User manual
