AURZEN ZIP Trifold Cyber Projector

Compact, foldable, and easy to use—the ZIP Cyber Edition lets you take your image wherever you need it. Its small size, built-in battery, and USB-C power supply with PD fast charging give you the freedom to operate without cables, while the Wi-Fi-free mirroring feature allows you to quickly stream content from your phone or computer. Add to that a portrait mode for mobile content and automatic focusing, making the projector ready to go practically right away—at home, on the go, and outdoors.

Foldable design and flexible positioning

The projector features a triple-fold Z-Fold design that allows it to be positioned at almost any angle. The 90° + 90° adjustment range enables projection onto a wall, directly onto the ceiling, or onto a tabletop without additional accessories. In practice, this provides greater flexibility—it’s easier to adjust the projector’s position to suit the location and situation.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Compact size and portability

The ZIP Cyber Edition stands out for its very small dimensions—approximately 8.4 x 7.8 x 2.6 cm with a volume of 170 cc. That’s roughly half the volume of a smartphone, meaning the device fits easily into a backpack or bag. Its light weight, comparable to that of a phone, makes it easy to take along on a trip or to a meeting.

DLP technology and image specifications

The DLP technology used ensures better image sharpness and clarity in this class of devices. The projector displays images at a native resolution of 720p (HD), with a brightness of 100 ANSI lumens and a contrast ratio of 300:1. These specifications work well for watching movies, giving presentations, or everyday use in dimly lit rooms.

Fast autofocus and ease of use

Thanks to the ToF (Time of Flight) sensor, automatic focusing takes just 0.3 seconds. The Zero-Lag Auto Focus system operates in real time, so the image remains clear even after adjusting the projector settings. This eliminates the need for manual adjustments and speeds up setup.

Image transmission without Wi-Fi

The AirLink Mirroring feature allows you to stream images directly from your phone or computer without needing a Wi-Fi connection. As a result, the projector works independently of internet access, which is particularly useful during trips, field presentations, or outdoor use.

Portrait mode for mobile content

The device offers a portrait display mode, which works well for viewing social media content. The ability to zoom in up to 3.2x allows you to fill the screen without black bars, improving the viewing experience for short videos.

Stereo sound and everyday use

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Built-in stereo speakers provide a better audio experience than the standard mono solutions found in small projectors. This allows the device to be used on its own, without the need to connect external audio.

Power and charging

The projector features a built-in battery that provides over 1.5 hours of runtime in Eco mode. Support for PD fast charging via USB-C enables efficient recharging, as well as powering the device from a power bank. Note that a minimum 24W adapter is required for simultaneous charging and use.

Wide Compatibility

The ZIP Cyber Edition works with iOS, Android, Windows, and macOS systems, making it easy to connect various devices. However, note that it is not compatible with Google Pixel phones or Chromebooks, which may be a factor when choosing your equipment.

Included

- Aurzen ZIP Projector
- Fast-charging cable
- User manual
- Welcome card

Manufacturer	Aurzen
Model	ZIP Cyber
Dimensions	84 x 78 x 26 mm (3.3" x 3.1" x 1")
Weight	280 g
Display technology	DLP®
Focus and keystone correction (Keystone H)	Automatic
Throw ratio	1.09:1
Speakers	Dual 1W speakers
