TELESIN Master Grip Camera Mount for iPhone 17 Pro (Standard Kit)

Take photos with greater comfort thanks to the TELESIN Master Grip! Designed for the iPhone 17 Pro, this grip ensures comfortable shooting and provides access to physical control buttons that make it easier to take photos and record videos. A two-stage shutter release, zoom control dial, and programmable buttons let you control key functions without having to touch the screen. The design also incorporates 7,600 mm² of graphene, which improves heat dissipation from the phone, increasing cooling efficiency by 25%. In addition, a 32 N magnetic mount ensures a stable connection while maintaining compatibility with MagSafe technology.

Shoot comfortably and with full control

Thanks to its physical buttons and dials, the TELESIN Master Grip lets you operate your iPhone’s camera much like a traditional camera. The two-stage shutter release lets you focus with a light press and then take a photo or start recording by pressing the button all the way down. A dedicated lever lets you comfortably zoom in and out, providing stable control over up to 8x zoom. In photo mode, you can adjust the zoom with 0.1x precision, while during video recording, the app allows you to smoothly adjust the zoom within the 1–3x range. You also have access to an Fn button, a mode dial, and a button for activating the camera and switching between cameras. The specially contoured grip adapts to hands of various sizes, and the CNC-machined aluminum thumb rest, featuring a non-slip texture, reduces the risk of accidentally touching the screen. The design is complemented by a silicone leather finish, which gives the accessory an elegant look inspired by classic cameras.

Create unique shots with the Reef Color app

Gain greater creative freedom with the Reef Color app, which offers 8 professional filters and advanced image customization options. The AI Master Filters feature automatically analyzes lighting conditions and optimizes settings, making it easy to achieve stunning effects without manual configuration. You can also assign various functions to the Fn buttons and the dial to instantly adjust filter intensity, EV exposure, shutter speed, ISO, or white balance. Each 5° rotation of the dial changes the effect intensity by 1%, giving you precise control over the look of your shots. The app also supports OTA updates.

Even More Possibilities with Filters and Accessories

The mount is equipped with CNC-machined aluminum rails with magnetic attachments, allowing you to use additional photographic filters. Depending on your needs, you can use UV, CPL, VND, Black Mist, or White Mist filters, as well as compatible adapter rings sold separately. This solution lets you expand your kit and adapt it to various shooting conditions. The design also allows you to position your phone vertically and mount it on a tripod using a 1/4" thread. The included wrist strap makes it easy to carry your gear, and the option to use an optional shoulder strap provides additional comfort.

Convenient Control and USB-C Charging

The TELESIN Master Grip is equipped with an 80 mAh battery that can be charged via the USB-C port in about 2 hours. It also features a magnetic charging port, a battery level indicator button, and a hole for attaching the wrist strap. The shutter button turns the grip on or off when held down for 2 seconds, while the Fn button allows you to switch dial functions and control recording, among other things. The first connection requires pairing the TELESIN_IP device via Bluetooth and enabling the Zoom feature in the iPhone’s Accessibility settings. This allows you to use physical camera controls and bring your photographic ideas to life more conveniently.
