

CLUB3D CAC-1933 4-Port USB-C® Charging Station 240W GaN PD 3.1 + PPS + LED Display

Model: CAC-1933

Manufacturer: CLUB3D

EAN: 8719214473907

Product Code: 1740554

R2,636

Description:

• High-Power Charging: This 4-port USB-C charger delivers a 240W total output and up to 140W on a single port, safely charging four devices simultaneously.

• Maximum safety: The charger uses GaN technology to maintain a compact design that stays cool. It also includes various safety features like overload and over voltage protection to offer maximum safety.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

• Display to track the wattage: A display tracks real-time wattage of each individual port, making it perfect to view if the connected devices are charging accurate.
• Perfect for: Multi-device tech setups, busy office workstations, and travel environments where charging multiple high-wattage laptops, tablets, and mobile accessories quickly is necessary
