Simultaneously power up your favourite pair of devices to enjoy together — whether that's your phone and Galaxy Watch or your Galaxy Watch and earbuds. At night, simply place to charge and you'll be set for the next day[1]

## Works well with others

The Wireless Charger Duo is compatible with a wide range of devices. Easily charge a variety of your favourites from your phone to your watch[2]

## Galaxy Watches are right at home

Charge your Galaxy Watch in a snap with its dedicated placement. This spot features an interior magnet on the right side, ensuring the watch fits snugly into place as you set it down[3]

## Power to power up

Get the charge you need quickly, thanks to up to 9W of Fast Charging support. This boost of battery is compatible with USB PD and Adaptive Fast Charging travel adapters for an easy pick-me-up[4]

## Dim for a good night's sleep

No need to let the light disturb your beauty rest. The Friendly LED not only intuitively changes colour to show your devices' charging status, it can also be set to dim so it doesn't interrupt your sleep[5]

## Leave your phone in the case

Your phone charges even while protected. The charge can reach through lightweight cases, so there's no need to fumble with taking off the case — simply place and charge[6]
