Yealink MSpeech is a smart USB speakerphone jointly developed by Yealink and the Microsoft Smart Voice team. Its built-in threemicrophone arrays can pick up the conference audio significantly. The 6+1 microphone on the top provides the voice recognition feature,including voice transcription, real-time translation, and Cortana voice assistant. Besides, its built-in 4W HD speakers provide crystalclear audio for the meeting room. MSpeech can meet the pickup and playback needs of medium-sized conference rooms and provideusers with a high-quality audio experience. As the Microsoft Teams conference room system's advanced audio accessory, MSpeechcan provide users with a smart, efficient, and high-definition conference audio experience
