Model: KDC7020I31

Manufacturer: GRUNDIG

EAN: 4013835533724

Product Code: 1742328

R14,286

The Digta 7 Stand-Alone Kit is a dictation and playback system for which you need no PC connection. It comes with the Digta 7 professional dictation device, the Digta Station 447 Plus docking station, headphones, and foot switch for dictation playback.

The Digta 7 Stand-Alone Kit allows you to generate dictations with the Digta 7 – even when you are on the go. You profit from the advantages of digital dictation, such as better recording quality and the ability to insert or delete sentences and set priorities and deadlines. The dictation device can simply be passed on to your secretarial staff when you are finished. They will see the outstanding dictations on the display, place the Digta 7 in the docking station, and play back the dictations with the help of the foot switch and headphones connected to the docking station. Each dictation can be individually selected, and can be deleted after transcription.
