the temperature allow you to obtain ironed items quickly and easily, saving time without sacrificing performance. The Calc Cleaning cleaning cycle, if performed regularly, maintains the performance and efficiency of the appliance, while the ECO function allows you to significantly reduce the consumption of electricity and water. Vaporella Express: fast, modern and technological.

ONE TEMPERATURE FOR ALL FABRICS

With Vaporella Express it will no longer be necessary to subdivide the clothes beforehand and you will not have long waiting times. With ONE TEMPERATURE technology you can iron all garments, from wool to linen, from silk to jeans with a single temperature setting.

DIGITAL SETTING: EVERYTHING UNDER CONTROL

Select the programs and functions of the machine with great ease, saving time thanks to DIGITAL SETTING on the iron handle. After 10 minutes of inactivity the appliance goes into stand-by, to guarantee total safety.

A SIMPLE DOUBLE CLICK AND GOODBYE CREASES

The powerful steam boost of 240 g/min is activated with a simple double click on the iron button: you can also iron the most resistant and stubborn creases without effort. You can also use the steam boost for vertical ironing.

VAPORELLA EXPRESS IS GREEN!

If you want to reduce consumption, select the ECO program that guarantees an important energy saving (-26%) and water (-31%) without compromising ironing results.

READY IN LESS THAN 1 MINUTE FOR LONG IRONING SESSIONS

If you are looking for a modern and technological product, ideal for ironing quickly and without interruptions, Vaporella Express is the right product for you. You can fill the large 1.6 L water tank at any time and forget about the long waiting times thanks to the rapid heat-up in less than 1 minute.

LIGHT AND EASY TO USE IRON

Iron all your garments with ease and precision thanks to the light iron with a wide, very smooth, anti-scratch ceramic plate. The steam exits the plate uniformly thanks to the holes in the tip and on the sides of the plate and penetrates deep into the fibres. While you are ironing you can also stand the iron vertically without having to necessarily put it on the machine.

YOU CAN PUT IT ANYWHERE

Vaporella Express takes up very little space. Its extremely compact size allows you to store it anywhere. Once the ironing has been completed, the water hose is placed under the machine and the appliance is safely secured using the iron lock for easy transport.

CALC CLEANING TO MANTAIN PERFORMANCE

Regular cleaning with the Clalc Cleaninig System will help maintain the performance and durability of the machine over time. This allows the limestone to be removed easily, thus ensuring optimal steam delivery is maintained.
