R3,136

Fast External SSD Storage

The Verbatim Metal Pocket SSD is a compact external solid state drive designed for fast, convenient data storage wherever you need it. USB 3.2 Gen 2 technology delivers data transfer rates of up to 10Gb/s, with read and write speeds of up to 1000MB/s*. Use it for backing up important files, transferring large documents, storing photos and videos, or expanding the storage of compatible computers and mobile devices. A dedicated USB-C port supports up to 100W Power Delivery 3.0 pass-through charging, allowing you to power your compatible laptop or phone while simultaneously accessing and transferring data through the SSD's separate data port.

Durable Aluminium Design

Designed for everyday portability, the Metal Pocket SSD features a robust aluminium housing that combines durability with a sleek, modern appearance. Inside, the M.2 form factor provides a compact solution for high-speed solid state storage. The integrated USB-C cable attachment keeps the connection cable conveniently with the drive, helping to reduce the need for additional accessories. With its compact dimensions and low weight, the Metal Pocket SSD is ideal for use at home, in the office or while travelling.

Convenient Data Protection

The Metal Pocket SSD includes a dedicated write protection button to help protect important files from accidental modification or deletion. This can be particularly useful when carrying backups, photographs, documents and other valuable data between different devices. The integrated USB-C cable provides convenient connectivity, while compatibility with Windows, Mac, iPhone and Android devices with USB-C ports makes this portable SSD a versatile storage solution.
