Freewell Standard Day filter set for OSMO NANO 4 pcs.

Model: FW-OSN-STD

Manufacturer: FREEWELL

EAN: 4897143171669

Product Code: 1743229

R1,674

Freewell "Standard Day" filter set for OSMO NANO – 4 pcs.

The ND8, ND16, ND32, and ND64 filter set is designed for shooting in bright sunlight, when it is difficult to achieve the perfect exposure. Each filter reduces the amount of light reaching the lens, allowing for better motion blur and a more natural look – without overexposure or loss of detail. ND8 (3-stop light reduction) works well on slightly cloudy days, ND16 (4-stop) in standard sunny conditions, ND32 (5-stop) in bright sunlight, and ND64 (6-stop) in very intense light – e.g., on snow, water, or in high mountains.

Lightweight, durable, and ready for field work

The filters are extremely lightweight (only 3.4 g), so they do not affect the gimbal's performance. They have a water, oil, dust, and scratch-resistant coating, as well as an anti-reflective layer that improves image clarity. Thanks to their tailored shape, they fit perfectly to the lens without causing vignetting. The set comes with a compact case for safe transport and storage.

Included

- ND8 filter
- ND16 filter
- ND32 filter
- ND64 filter
- Filter case
- Cleaning cloth
