MOES WB-JK-AC-C-MS Smart Alarm Clock, Wi-Fi

Enjoy pleasant mornings and peaceful evenings with the MOES WB-JK-AC-C-MS smart alarm clock. The device features a sunrise and sunset simulation function, allowing you to wake up to gradually brightening light and fall asleep surrounded by gently dimming lighting. You have access to 4 independent alarms, 7 alarm tones, an FM radio, and a snooze function. The alarm clock also doubles as a night light with 7 light colors, and thanks to Wi-Fi connectivity, integration with the Tuya app, and compatibility with Amazon Alexa and Google Assistant, you can conveniently control it remotely or by voice. The device is rounded out by automatic display brightness adjustment and a stable design with two legs.

A natural wake-up and peaceful sleep

Start your day without being jolted awake by a loud alarm. The MOES WB-JK-AC-C-MS simulates a sunrise, gradually increasing the brightness of the light even before the alarm sound starts. You can set the brightness increase time from 10 to 60 minutes and adjust the brightness level from 0 to 20 to tailor your wake-up experience to your preferences. In the evening, use the sunset simulation feature, which smoothly dims the light until it turns off completely. The gentle transitions between light and dark are easy on the eyes and help create comfortable conditions for rest.

Four Alarms and Sounds Tailored to You

Customize the alarm clock to your schedule and forget about changing the settings every day. The device lets you program up to 4 independent alarms, and dedicated modes for weekdays and weekends make it easy to organize your wake-up times. You can choose from 7 sounds, such as birdsong, ocean waves, a stream, wind chimes, a gentle melody, piano music, or a classic alarm tone. You can also wake up to FM radio. If you need a few more minutes of rest, use the snooze function with an adjustable time ranging from 8 to 15 minutes. The manual also describes a 9-minute snooze with up to 5 repeats. You can turn off the alarm using the button on the unit, and if you don’t respond, it will stop automatically after 30 minutes, remaining active for the next day.

Mood Lighting and a Soft Night Light

Create an atmosphere in your bedroom tailored to your needs with 7 lighting colors. The alarm clock allows you to manually select a color or activate an automatic, smooth color-changing mode, and the brightness control lets you adjust the light intensity to suit the situation. MOES also works well as a discreet nightlight that emits a soft, dimmed glow. Simply press the snooze button to activate subtle ambient lighting without having to turn on the room’s main lights. This allows you to move around your bedroom more freely at night, avoiding being suddenly blinded by intense light.

Smart Control via Wi-Fi

Manage the alarm clock’s functions without having to reach for the buttons on the unit. Thanks to Wi-Fi connectivity and compatibility with the Tuya ecosystem, you can wirelessly control the device using the app available on Google Play and the App Store. The MOES WB-JK-AC-C-MS also works with Amazon Alexa and Google Assistant, enabling convenient hands-free voice control. An additional advantage is the group control feature, which lets you manage individual devices or entire groups of

devices assigned to rooms such as the bedroom, living room, or home office. This makes the alarm clock a practical addition to your smart home.

FM Radio and Display with Automatic Brightness Adjustment

Listen to your favorite radio stations at any time thanks to the built-in FM radio. The alarm clock features automatic band scanning and station presets, as well as manual tuning with a precision of 0.1 MHz. Holding down the corresponding button lets you quickly switch between saved stations, while the volume control allows you to adjust the sound to your preferences. The device is also equipped with a display featuring a light sensor that automatically adjusts the backlight brightness to the conditions in the room. This ensures the time remains legible during the day, while at night the screen does not glow too brightly. You can also adjust the brightness manually.

Well-thought-out design and convenient operation

The MOES WB-JK-AC-C-MS stands out with its improved design, featuring a base with two legs that increase the device’s stability. Buttons on the housing allow for convenient control of alarms, the snooze function, lighting, FM radio, volume, and clock settings. There is also a separate button to activate sleep mode and a new reset button. The alarm clock is equipped with a Micro USB power input and a USB output, which can be used, for example, to charge a phone.

Package Contents

- Alarm clock with wake-up light × 1
- USB cable × 1
- Stand bases / legs × 2
- User manual × 1
