R5,647

Open-ear design. All-day comfort

Introducing the all-new OpenMeet2. The open-ear design reduces ear pressure, heat buildup, and fatigue. Breathable, ergonomic, and built for extended wearing, from your first call to your last.

Shokz GlideFit™. Engineered for a secure, stable fit.

Inspired by the precision fit of premium eyewear, Shokz GlideFit™ uses an inward-contoured frame to distribute tension evenly, so the headset stays secure through every meeting, call, and coffee

break.

AI-powered call clarity.

Crystal clear calls in every environment.

Powered by the Qualcomm® QCC3096 chip, OpenMeet 2's dual-microphone system uses AI to isolate your voice and filter out the rest. From office chatter and keyboard clicks to a barking dog or a busy café, up to 99.4% of background noise is reduced — so every call is crisp and clear.

Precision audio crafted for every detail.

Shokz DualPitch™ Technology fuses an air-conduction driver with a high-performance bone conduction core, tuned by a digital crossover algorithm to deliver a rich, full-range listening experience.

Open-ear design.

Stay present. Stay aware

OpenMeet2's signature open-ear design keeps your ear canals free, so you can catch a colleague's question, follow a side conversation, stay attuned to your surroundings — all without ever taking your headset off.
