ROG Astral GeForce RTX™ 5090 BTF Edition

The Final Frontier

The ROG Astral GeForce RTX 5090 BTF Edition is engineered for unparalleled performance and flexibility. Featuring the latest BTF technology, it incorporates an innovative detachable graphics card high-power (GC-HPWR) adapter withstand up to 1000 watts, whose detachable design ensures compatibility with both standard and BTF motherboards.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

To keep this powerhouse cool, the ROG Astral RTX 5090 BTF boasts a quad-fan design, complemented by a patented vapor chamber, increased heatsink fin density, and a phase-change GPU thermal pad. These advanced cooling solutions, combined with towering default clock speeds and boosted power delivery, ensure it's ready to conquer even the most demanding gaming scenarios.

ASUS BTF ECOSYSTEM

Truly Cable-Free Hidden-Connector Design

Experience the future of PC building with the BTF series. Combining a BTF graphics card, motherboard, and chassis unlocks a complete hidden-connector experience, eliminating visible cables for an unparalleled clean aesthetic. The advanced BTF approach, powered by the graphics card high-power slot on BTF motherboards, delivers substantial power. And now, with our innovative detachable graphics card high power (GC-HPWR) adapter design, BTF graphics cards offer unmatched compatibility, working seamlessly with both standard and BTF motherboards. Plus, the enhanced GC-HPWR adapter now withstands up to 1000 watts, ensuring optimal performance for even the most demanding GPUs.

Detachable Graphics Card High Power (GC-HPWR) Adapter

The detachable Graphics Card High Power (GC-HPWR) adapter makes BTF graphics cards compatible with both standard and BTF motherboards, giving users greater flexibility and upgradability for their system builds.

The adapter can withstand up to 1000 watts for peak performance.
