3Doodler is one of those fantastic ideas that seem so obvious in hindsight that it's hard to believe that they are only now being implemented.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The premise is simple: the pen draws with molten filament, which makes it possible to build 3D objects in the same way as a 3D printer, but without creating computer models.

Using the 3Doodler pen is incredibly simple. To start creative fun, just place the selected color of filament in the guide and after a while you can start creating. You are only limited by your creativity!

Creating with 3D printing has never been so easy and enjoyable!!!
