The Conceptronic DONN32B 14-in-1 USB-C Docking Station unlocks full workstation potential by expanding a single USB-C connection into triple-display video, high-speed USB, wired networking, audio and card reader interfaces in one compact hub.

Designed for productivity, it supports triple extended-mode displays on Windows via one HDMI port and two DisplayPort ports, each capable of resolutions up to 4K 60Hz. This allows you to run multiple applications across three crisp 4K monitors, ideal for creative work, data analysis, coding, content creation and multitasking in modern offices or home workspaces.

The dock provides five 5Gbps USB ports (2 x USB-C, 3 x USB-A), SD/TF 3.0 card readers with UHS-I speeds up to 104MB/s, and a Gigabit Ethernet port up to 1000Mbps with Wake-on-LAN support for reliable wired connectivity. USB Power Delivery up to 100W keeps your laptop powered, while a 3.5mm combo jack handles headphones and microphones. An integrated security slot, aluminum casing for heat dissipation, multi-platform support and plug-and-play installation make the DONN32B a robust all-in-one connectivity solution.
