FREEWELL Filter Set for Insta360 Luna Pro All Day (8-piece set)

The Freewell All Day Filter Set for the Insta360 Luna Pro is a practical solution for creators who shoot in a variety of lighting conditions. The set includes 8 filters—4 ND filters (ND8, ND16, ND32, ND64) and 4 ND/PL filters—that make it easier to control exposure, reduce the amount of light reaching the lens, and help achieve natural-looking motion in your footage. Thanks to its various levels of light reduction, the set works well in both moderate daylight and when filming in direct sunlight.

Exposure Control in Various Lighting Conditions

The ND8, ND16, ND32, and ND64 filters reduce the amount of light entering the lens, allowing you to use appropriately selected shutter speeds even in bright environments. This helps preserve natural motion blur in your footage and prevents overexposure. The various levels of density make it easy to

adjust your camera settings to current conditions without sacrificing your intended visual effect.

Fewer Glare and Better Contrast Thanks to ND/PL Filters

The kit also includes 4 ND/PL filters, which combine the properties of neutral density and polarizing filters. In addition to limiting the amount of light, they help reduce reflections from non-metallic surfaces, such as water or glass, and improve image contrast. As a result, footage shot on sunny days can feature more vivid colors and clearer details.

One set for a full day of filming

The Freewell All Day 8-Pack lets you prepare for changing lighting conditions when filming outdoors. A wide selection of filters allows you to quickly adjust the level of darkening and apply polarization depending on the needs of a specific scene. This is a useful solution when traveling, filming landscapes, and creating everyday video content, when light intensity changes throughout the day.

Included

- ND8 filter
- ND16 filter
- ND32 filter
- ND64 filter
- ND8/PL filter
- ND16/PL filter
- ND32/PL filter
- ND64/PL filter

Manufacturer	Freewell
