FREEWELL Filter Set for Insta360 Luna Pro (4-piece set)

The FREEWELL Filter Set for Insta360 Luna Pro is a practical solution for those who want to achieve better video and photo quality in sunny conditions. The set includes four hybrid ND/PL filters: ND8/PL, ND16/PL, ND32/PL, and ND64/PL, which combine light reduction with polarization control. This allows you to reduce unwanted reflections, improve contrast and color saturation, and maintain an appropriate shutter speed while filming. Different levels of darkness let you adjust the filter to current lighting conditions.

Glare Reduction and More Vivid Colors

FREEWELL ND/PL filters help reduce light reflections from non-metallic surfaces, such as water, glass, or wet pavement. As a result, your footage can achieve better contrast, more natural colors,

and greater clarity. This is particularly useful when filming landscapes, city streets, or scenes near bodies of water.

Smooth Footage in Bright Environments

Combining a neutral density (ND) filter with a polarizing (PL) filter allows you to simultaneously control the amount of light reaching the lens and reduce reflections. Reducing the amount of light makes it easier to maintain an appropriate shutter speed even in bright sunlight. This allows you to achieve natural motion blur and smoother-looking footage without having to shorten the exposure time excessively.

Four filters for different lighting conditions

The set includes ND8/PL, ND16/PL, ND32/PL, and ND64/PL filters, which offer different levels of light reduction. This allows you to choose the right option whether you’re filming on a moderately sunny day or in very bright conditions. The four available filters provide greater flexibility when creating content outdoors, regardless of changing conditions.

Included

- FREEWELL ND8/PL filter
- FREEWELL ND16/PL filter
- FREEWELL ND32/PL filter
- FREEWELL ND64/PL filter

Manufacturer	FREEWELL
Model	FW-LUNP-BRG
Product Type	ND/PL filter set
Compatibility	Insta360 Luna Pro
Number of Filters	4
Filter Types	ND8/PL, ND16/PL, ND32/PL, ND64/PL
Light Reduction	3, 4, 5, and 6 EV stops
