FREEWELL ND Filter Set for Insta360 Luna Pro (4-piece set)

The Freewell Standard Day ND Filter Set is a practical accessory for the Insta360 Luna Pro camera that makes it easier to record videos in various lighting conditions. The set includes four filters with different levels of light reduction: ND8, ND16, ND32, and ND64. They reduce the amount of light reaching the lens, making it easier to control exposure and shutter speed. This allows you to achieve smoother, more natural-looking motion blur, even when filming on sunny days.

Better Exposure Control While Filming

Neutral density (ND) filters reduce the amount of light entering the lens, allowing you to use longer shutter speeds without overexposing the image. This is particularly useful when recording dynamic outdoor scenes, where intense sunlight makes it difficult to achieve a natural motion blur effect.

Four filters for different lighting conditions

The set includes ND8, ND16, ND32, and ND64 filters, allowing you to easily adjust the level of reduction to suit current conditions. The ND8 works well in softer daylight, while the ND16 and ND32 help reduce exposure in sunnier conditions. The ND64 provides the strongest reduction, which is useful when filming in intense sunlight. This selection makes it easy to adjust your camera settings to changing lighting conditions.

Convenient Everyday Filming

Freewell Standard Day filters are designed for everyday outdoor video recording. The ability to choose from four levels of reduction gives you greater control over the look of your shots in both moderate light and full sunlight. This is a useful solution for those who want to achieve a more natural motion effect in their footage.

Included

- ND8 filter
- ND16 filter
- ND32 filter
- ND64 filter

Manufacturer	Freewell
Model	Standard Day ND Filter Kit
Compatibility	Insta360 Luna Pro
Filter type	ND (neutral density)
Number of filters	4
Filter variants	ND8, ND16, ND32, ND64
Intended use	Video recording in daylight
Function	Light reduction, exposure control, and shutter speed control
