Thrustmaster 4060091 interface hub Black, Silver

Model: 4060091

Manufacturer: THRUSTMASTER

EAN: 3362934001629

Product Code: 1748005

R1,970

Fully enjoy Thrustmaster Ecosystem on console (PS4, Xbox One) with the new TM Sim Hub. The TM SIM HUB allows to connect up to 4 Thrustmaster add-ons simultaneously on compatible Thrustmaster wheel bases.

The TM Sim Hub is compatible on PS4™ & Xbox One® with:

- the base of the Thrustmaster T-GT, T300-Series, TS-XW Racer and TX-Series racing wheels

- the TSS Handbrake Sparco® Mod / TSS Handbrake Sparco® Mod +

- the TH8A Add-On Shifter gearbox.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

On PS4™ and Xbox One®, the TM SIM HUB allows you to simultaneously connect up to four accessories directly to the mini-DIN connector located at the back of the compatible Thrustmaster racing wheel’s base.

Note regarding the TSS Handbrake Sparco® Mod In Ps4™ And Xbox One® Games

When the TSS Handbrake Sparco® Mod is connected to a compatible Thrustmaster racing wheel base or to the TM SIM HUB:

- sequential mode [+/-] is functional in all games, as it is associated with the wheel’s UP and DOWN paddle shifters.

- handbrake mode [progressive] is functional in games which support the handbrake function.

Additional precisions on console multi-equipment

On Xbox One, the TM Sim Hub is compulsory to play with more than 1 add-on. TM Sim Hub has to be plugged in a compatible wheel base DIN port. Then add-ons (TH8A, TSSH) have to be plugged in the TM Sim Hub ports.

On PS4, some games support/allow the TH8A plugged in the PS4 USB port and the TSS Handbrake plugged on the wheel base DIN port.

On games not supporting the TH8A in USB, TM Sim Hub is then compulsory to play with more than 1 add-on.
