

Thrustmaster Airbus Edition Black, Blue USB Joystick Analogue / Digital PC

Model: 2960842

Manufacturer: THRUSTMASTER

EAN: 3362932915577

Product Code: 1748580

R4,535

The TCA Officer Pack Airbus Edition includes the TCA Sidestick Airbus Edition and the TCA Quadrant Airbus Edition, for a complete civil aviation experience — with all the features you need to step into the captain’s role, without any pressure.

Ergonomic replicas of the Airbus sidestick and throttle quadrant, similar to those found in the well-known Airbus A320/A320neo airliners, these Airbus civil aviation accessories include all the features required for piloting any type of civil aircraft — from business jets to transport aircraft, and aerobatic aircraft as well.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The TCA Officer Pack Airbus Edition is composed of products that are iconic on every level: the replica design of each device mirrors the original shapes and colors, with incredibly authentic and lifelike feel on the different components.

You'll love using the wide variety of controls inspired by those found on real Airbus airliners: button feel and response times, resistance on the thrust levers, the sounds components make when activated, and even how they feel to the touch. Everything is right there at your fingertips for next-level replica flight sessions.

The two flight instruments included in the pack also include features allowing users to easily adapt to all other types of flight simulation games. Take a break from your commercial aircraft and head off in your fighter plane or spaceship — with total confidence!

Thanks to its mechanical selectors, the TCA Quadrant Airbus Edition lets you disable the detents and thrust reversers, for flexible piloting of any type of aircraft.

With the TCA Sidestick Airbus Edition, you can easily adapt the sidestick's configuration before each takeoff for the best fit with the game that you're playing, thanks to the 4 included swappable joystick head button modules.

The TCA Officer Pack Airbus Edition incorporates the celebrated proprietary H.E.A.R.T (HallEffect AccuRate Technology) system from Thrustmaster, providing gamers with enhanced realism thanks to the built-in magnetic sensors allowing for up to 14-bit resolution on the sidestick, and up to 16-bit resolution on the throttle quadrant.

This contactless magnetic sensor technology, with no potentiometers, gives both devices an unlimited lifespan.

These products are compatible with PC (Windows 10, 8).

Operate your aircraft with precision!

Fully ambidextrous and modular joystick, with 4 swappable joystick head button modules that let you choose between 4 different configurations (right or left seat of an airliner, narrow or wide center stick configuration for small aircraft)
Ergonomic replica of the Airbus sidestick (A320 type), with built-in throttle axis and thrust reverser mechanism

17 action buttons with “braille”-style identification!

12 buttons on the base, 4 on the joystick, and 1 virtual button on the throttle (bottom 20% of the axis)

New 8-direction point of view hat switch, designed for extreme precision

4 independent axes, with twist rudder (controlled by rotating the joystick handle)

Selector switch lets you configure the 12 buttons on the base, in either the right-handed or left-handed position

Weighted base for enhanced stability

Precise, versatile thrust control

Ergonomic replica of the Airbus throttle quadrant, for completely realistic takeoffs and landings:

- Thrust levers similar to those found on Airbus aircraft, with thrust reverser mechanism
- Realistic detents: "Idle" / "Climb" / "Flex" / "TO/GA"
- 2 “Engine Master” selector switches
- 8 physical action buttons + 8 virtual buttons on each axis for the thrust levers (16 in total)

Throttle quadrant includes connectors for upcoming add-ons in the Thrustmaster TCA ecosystem (sold separately)

2 throttle quadrants can be linked together (additional throttle quadrant sold separately), giving you access to 4 thrust levers instead of 2!

Thrust levers with 2 axes + connector for Thrustmaster T.Flight Rudder Pedals (sold separately)
