DarkFlash C280 computer case (black)

Model: C280 BLK NoF

Manufacturer: DARKFLASH

EAN: 4711527007491

Product Code: 1749603

R1,700

DarkFlash C280 computer case (black)

The DarkFlash C280 is a spacious computer case designed for complex configurations and impressive component display. It supports E-ATX, ATX, Micro-ATX, and ITX motherboards, as well as graphics cards up to 420 mm in length and CPU coolers up to 155 mm in height. This gives you a lot of freedom in choosing components. The 443 × 277 × 426 mm design is made of SPCC sheet metal and complemented by tempered glass panels, ensuring robustness and a modern look.

270° panoramic design – an eye-catching configuration

The C280 model uses a 270° panoramic design with no vertical corner profile, allowing the interior of the case to be fully visible from both sides. The glass side panels allow you to showcase, for example, water cooling with a screen or RGB-backlit fans. This solution makes the case ideal for showcase and gaming setups. Create a unique configuration and highlight the character of your workstation!

Efficient heat dissipation system

The modular ventilation system design supports effective heat dissipation inside the case. In addition, the C280 model allows for the installation of up to ten 120 mm fans or 240/280/360 mm water cooling. This allows you to play demanding games or use advanced video editing or graphics editing software without worrying about your computer overheating.

Space for large components and vertical GPU mounting

The C280 is designed to accommodate graphics cards up to 420 mm in length – you can also mount your GPU horizontally or vertically. This allows you to easily organize the space inside the case according to your vision! The spacious interior also allows you to install CPU cooling up to 155 mm in height and E-ATX, ATX, M-ATX, and ITX motherboards. For ATX and M-ATX standards, back-connect designs are also supported, which facilitates cable management and improves aesthetics. You also have 7 expansion card slots and a multifunctional bracket for mounting 3 SSDs or 2 HDDs.

Refined in every detail

The case has been designed to allow quick and easy removal of panels, which facilitates expansion and maintenance of the set. The whole thing is complemented by dust filters located at the top and bottom of the structure, which limit the ingress of contaminants into the interior.

Convenient access to ports

At the top of the case, you will find a set of useful ports. You have a USB 3.0 connector, two USB 2.0 connectors, an HD audio jack, as well as power and reset buttons at your disposal. So you can conveniently connect a mouse and keyboard to your computer, transfer files, use headphones, and much more.

Manufacturer	DarkFlash
