Product Code: 202895

R2,372

The PowerBox Pro is an outdoor five gigabit Ethernet port router with PoE output on four ports. Since the device has a waterproof outdoor case, you can mount it on a tower, or in other outdoor locations. It also supports passive PoE input and passive or 802.3af/at PoE output. Ethernet ports 2-5 can power other PoE capable devices with the same voltage as applied to the unit. Less power adapters and cables to worry about! The device has a SFP port for adding optical fiber connectivity. It is affordable, small and easy to use, but at the same time comes with a very powerful 800 MHz CPU, capable of all the advanced configurations.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
