Huion Note X10 digital notebook

The Huion Note X10 is a versatile A5-format digital notebook that redefines the way you take notes and sketches. The device combines traditional paper writing with advanced digital synchronization, offering features such as offline writing, in-app editing, one-click PDF sharing and a graphic tablet mode for artists. With long battery life, Bluetooth 5.0 technology, and the included PW320 stylus, the Huion Note X10 is the perfect tool for both everyday work and creative projects.

Paper and technology in one elegant package

The Huion Note X10 comes in the form of a classic A5 notebook with a durable, elegant leather cover and removable paper (50 pages), providing the comfort of writing like regular paper. It comes with a PW320 stylus, supporting up to 4096 levels of pressure for smoother and more precise lines. The stylus is battery-free and supports both plastic tips and standard ballpoint nibs - ideal for writing, sketching or note-taking.

Expand your capabilities with the app

With the Huion Note app, you can edit, highlight, delete and organize all your handwritten notes. In addition, the device allows you to record your voice while writing - a feature that will come in handy especially during meetings or lectures. You can play back your notes along with the audio recording at any time to go back to key information more easily. You can easily share your finished notes with others in PDF format.

Constant connectivity and long-lasting performance with Bluetooth 5.0

The Notebook automatically pairs with your smartphone when you open the app and disconnects when you close it - all thanks to advanced Bluetooth 5.0 technology. The tablet runs for up to 18 hours on a single charge, and standby time reaches 30 days. A built-in LED indicator lets you know the charge level. With its compact A5 format and magnetic stylus holder, you can take the Huion Note X10 anywhere.

Offline recording and scalable vector recording

You don't need a connection to your device to create - the Huion Note X10 saves up to 50 pages offline and converts them into scalable vectors when synced with your smartphone. You can edit them freely, enlarge them without losing quality, export them to PDF and make corrections, all without pixelation.

Graphics tablet mode for artists

It's not just a notepad - when you remove the sheets of paper and insert a special panel, the Huion Note X10 turns into a full-fledged graphics tablet. It supports 4096 levels of pressure and precise tilt of the stylus, which allows you to draw digitally with high precision. It's a feature that will appeal to any creator who values tool versatility.
