Product Code: 301680

R3,301

The Philips 27E2N2500 features a 27-inch QHD display with a native resolution of 2560 x 1440. It utilizes TFT active matrix technology for vibrant image quality and has a peak brightness of 300 cd/m², ensuring visuals are sharp and lifelike. The monitor's 178-degree horizontal and vertical viewing angles allow for an exceptional viewing experience from any position, making it suitable for collaborative workspaces. With a sleek ultra-thin bezel design, it complements modern setups while maximizing screen real estate.

In addition to excellent image quality, the monitor incorporates Flicker-Free technology and LowBlue Mode to minimize eye strain during extended use. Fast response times of 4 ms make it suitable for gaming and multimedia content without motion blur. Adaptive-Sync technology enhances the gaming experience by synchronizing the display refresh rate with the GPU, eliminating screen tearing. Whether for work or leisure, the Philips 27E2N2500 brings together performance and thoughtful design to elevate productivity and entertainment.
