Security is no longer just about protecting information, it is critical to maintaining trust with customers and protecting the organization's brand and reputation. Breaches cause customers to take their business elsewhere, resulting in material and substantially negative impacts to an organization's bottom line. Attracting new customers is estimated at seven times more costly than keeping existing customers. Fines and legal fees can quickly add up. Publicly traded organizations can see negative and lasting impacts to their stock value, supplier relationships and shareholder perceptions. All these add up to explain why more boards are getting involved in security decisions. FortiSIEM provides organizations with a comprehensive, holistic and scalable solution, from IoT to the cloud, with analytics that are actionable to tightly manage network security, performance and compliance standards, all delivered through a single pane of glass view of the organization.
