The Philips 24B2U3601 monitor offers a viewing experience with its 24-inch QHD display, providing image quality at a native resolution of 2560 x 1440. The TFT technology and 178-degree vertical and horizontal viewing angles allow for color representation and comfortable use from multiple positions. Adaptive-Sync technology, along with Flicker-Free and SoftBlue technologies, enhances visual comfort by reducing eye strain, making it suitable for prolonged use. Versatile connectivity options including HDMI, DisplayPort, and USB-C cables cater to a range of devices, while the built-in USB hub
