The Philips Evnia 5000 27M2C5201L monitor is designed for immersive viewing experiences, featuring a 27-inch display with a 1500R curvature that enhances depth perception and brings games and movies to life. With HDR10 support and a Full HD (1080p) video format, this monitor delivers rich colors and sharp details, making it suitable for gaming and multimedia consumption. The Fast VA technology provides a typical response time of 0.5 ms, along with features like Motion Blur Reduction and Low Input Lag, ensuring smooth performance without interruptions. This monitor excels in visual performance and offers versatility with multiple interfaces including

HDMI and DisplayPort. SmartContrast and SmartImage Game features optimize display settings for
