Discover the Philips 27E2N1110 monitor, designed for enhanced visual experiences with its 27-inch Full HD 1080p display. Offering a vibrant native resolution of 1920 x 1080 and a rapid response time of 1 ms, this monitor is suited for both productivity and entertainment. The advanced TFT active matrix technology ensures vivid colors and sharp images while the 178-degree viewing angles allow for consistent picture quality from virtually any perspective.

This monitor incorporates features such as Flicker-Free technology and LowBlue Mode to reduce eye strain, providing a more comfortable viewing experience. With SmartContrast and SmartImage technologies, images are optimized in real-time for clarity and detail. The anti-glare coating enhances usability in various lighting conditions, making the Philips 27E2N1110 a versatile addition to any desktop setup.
